

callista hospitality

Changing the face of small to midsize
motels, hotels, B&Bs & lodges

A motel stay is more than just a comfortable bed, clean linen, endless hot water, quiet surroundings and a stunning view. Guests notice the little things - like how quickly their reservations were confirmed, efficiency at checkin/checkout, the ability to provide account updates on demand and a professionally and rapidly produced invoice which is complete and accurate when it's time to go.

And now just because you run a small property, it doesn't mean you have to continue to struggle with out-dated and time-consuming manual processes or even electronic systems which are unsupported or well past their use-by date when you have a million and one other things to do.

Callista Hospitality gives even the smallest properties the ability to operate as large hotels do providing you with a completely professional image and giving your guests confidence that they're in good hands. **And you don't have to pay a fortune for it.**

It takes care of everything for you from reservations (including on-line reservations) to debtors automatically keeping track of all transactions (including phone calls) and providing valuable management reports so that you are always in control of your business.

Contact us for a free on-line demo.
